Part A. PERSONAL INFORMATION

CVA date	02/11/2026

First name	Rodrigo		
Family name	Granjel Rodríguez		
Gender	Male	Birth date	09/07/1993
ID number	53817055E		
URL Web	https://granjel.github.io/		
Email	rodrigo.granjel@bc3research.org		
ORCID (Open Researcher and Contributor ID)	0000-0002-7785-4106		

A.1. Current position

Position	Postdoctoral researcher		
Start date	15/05/2023 (42 months*) *19 weeks of parental leave between 10/2025 and 09/2026		
Institution	Basque Centre for Climate Change (BC3)		
Department	Ecosystems and Global Change		
Country	Spain	Phone number	+34 667 04 86 44
Keywords	Community ecology; Species coexistence; Biotic interactions; Global change; Ecosystem stability and recovery		

A.2. Previous positions

Period	Position / Institution / Country
06/2022 – 03/2023 (10 months)	Fulbright research fellow / North Carolina State University / USA
11/2017 – 03/2022 (53 months)	FPU doctoral researcher / Universidad de Sevilla / Spain
09/2017 – 10/2017 (2 months)	JAE-INTRO research assistant / Instituto de Recursos Naturales y Agrobiología de Sevilla / Spain

A.3. Education

Degree / Master's / PhD	University / Country	Year
PhD in Integrative Biology	Universidad de Sevilla / Spain	2023
MSc in Terrestrial Ecology	Universitat Autònoma de Barcelona / Spain	2017
BSc in Biology	Universidad de Vigo / Spain	2016

Part B. CV SUMMARY

To complete: summarise my scientific contributions, experience and impact (max. 5,000 characters, including spaces).

Part C. RELEVANT MERITS

C.1. Publications

1. *Journal article.* **Granjel RR**, Gross N, Badenhausser I, Arroyo J, Godoy O. 2026. Simple plant–plant interaction patterns predict structural niche and fitness differences in a multitrophic grassland community. OIKOS, e12212 https://doi.org/10.1002/oik.12212

   > Corresponding author and position 1/5 authors. I led data curation, statistical analysis, software development, visualisation and writing, and co-developed the conceptual framework and methods to connect multitrophic interactions with plant coexistence.

2. *Journal article.* **Granjel RR**, Martín-Cacheda L, Röder G, Izquierdo-Ferreiro I, Martín-Díaz A, Picó FX. 2026. Plant–plant signalling reduces herbivore damage in two Arabidopsis thaliana populations with contrasting life histories. ENVIRONMENTAL AND EXPERIMENTAL BOTANY 251, 106472 https://doi.org/10.1016/j.envexpbot.2026.106472

   > Corresponding author and position 1/6 authors. I contributed to study design, experiments, data analysis and writing, and obtained AEET funding for the project on volatile-mediated plant defence in populations with contrasting life histories.

3. *Journal article.* Huang M, **Granjel RR**, Montoya D, Xiao Y, Liu X, Hautier Y. 2026. Plant diversity within communities, not among them, stabilizes grassland productivity across spatial scales. NATURE COMMUNICATIONS 17, 2145 https://doi.org/10.1038/s41467-026-69028-5
   > Position 2/6 authors. I contributed to statistical analyses, interpretation of results and manuscript development in a study combining field surveys and remote sensing across 235 grasslands to assess biodiversity–stability relationships across spatial scales.
4. *Journal article.* Montoya D, Burón-Ugarte A, …, **Granjel RR**, …, Porras-Gómez J. 2025. Complexity and interpretability in global change ecology. PLOS CLIMATE 4, e0000587 https://doi.org/10.1371/journal.pclm.0000587
   > Position 5/10 authors. I contributed to conceptualisation, drafting and revision of a synthesis examining how ecological complexity affects the interpretability of global change research.
5. *Journal article.* Jiménez-Mejías P, Manzano S, Gowda V, …, **Granjel RR**, …, Fitzpatrick M. 2024. Protecting stable biological nomenclatural systems enables universal communication: A collective international appeal. BIOSCIENCE 74, 467–472 https://doi.org/10.1093/biosci/biae043
   > Position 1280/1563 authors. I endorsed an international appeal advocating stable biological nomenclature to support universal scientific communication.
6. *Journal article.* **Granjel RR**, Allan E, Godoy O. 2023. Nitrogen enrichment and foliar fungal pathogens affect the mechanisms of multispecies plant coexistence. NEW PHYTOLOGIST 237, 2332–2346 https://doi.org/10.1111/nph.18689
   > Corresponding author and position 1/3 authors. I co-designed the research and analyses, performed the research, analysed the data, produced the figures and wrote the manuscript, linking nitrogen enrichment and fungal pathogens to multispecies coexistence mechanisms.
7. *Journal article.* Moreira X, **Granjel RR**, de la Fuente M, …, Rasmann S. 2021. Apparent inhibition of induced plant volatiles by a fungal pathogen prevents airborne communication between potato plants. PLANT, CELL & ENVIRONMENT 44, 1192–1201 https://doi.org/10.1111/pce.13961
   > Position 2/10 authors. I helped design and perform the experiment testing how fungal infection affects volatile-mediated communication between potato plants.
8. *Journal article.* Juan-Ovejero R, **Granjel RR**, Ramil-Rego P, Briones MJI. 2020. The interplay between abiotic factors and below-ground biological interactions regulates carbon exports from peatlands. GEODERMA 368, 114313 https://doi.org/10.1016/j.geoderma.2020.114313
   > Position 2/4 authors. I co-authored a two-year peatland study linking abiotic conditions and interactions among plants, soil fauna and microbes to carbon exports.
9. *Book chapter.* **Granjel RR**, Juan Ovejero R, Briones MJI. 2017. Diversidad edáfica en diferentes hábitats turbosos de la serra do Xistral. CONSERVACIÓN E XESTIÓN DE HUMIDAIS EN GALICIA. HORREUM-IBADER, 31–48. ISBN: 978-84-939661-4-0
   > Position 1/3 authors. I co-authored a chapter on soil biodiversity across different peatland habitats in Serra do Xistral, Galicia.

C.2. Conferences

1. *Invited seminar.* Starting over: Or the hard life of plants in a recovery dynamics experiment. Rheinland-Pfälzische Technische Universität Kaiserslautern-Landau. June 2026. Landau (Germany)
2. *Scientific committee member, session coordinator and moderator.* The Interplay Between Species Coexistence and Abiotic Factors: Community Ecology (General Session GSC). III SIBECOL & XVII AEET Meeting. June 2025. Pontevedra (Spain)
3. *Poster presentation.* **Granjel RR**, Montoya D. How does warming affect the coexistence mechanisms of recovering communities? III SIBECOL & XVII AEET meeting. June 2025. Pontevedra (Spain)
4. *Invited seminar.* Theory < data for community ecology. Rheinland-Pfälzische Technische Universität Kaiserslautern-Landau. April 2025. Landau (Germany)
5. *Oral presentation.* **Granjel RR**, Buche L, Spaak J, Godoy O. Environmental variability and the mechanisms behind species persistence. XV AEET National Conference. October 2021. Plasencia (Spain)

6. *Oral presentation.* **Granjel RR**, Allan E, Godoy O. The consequences of nitrogen enrichment and foliar pathogens for multispecies coexistence in grasslands. Festival of Ecology BES. December 2020. Online
7. *Poster presentation.* **Granjel RR**. Coexistence and VOC-mediated plant-plant communication in response to insect herbivory (CoVOCom). XVII ECOFLOR Meeting AEET. March 2020. Bilbao (Spain)
8. *Invited seminar.* The struggle for coexistence: Studying biodiversity beyond pairwise interactions. Universität Bern. October 2019. Bern (Switzerland)
9. *Oral presentation.* **Granjel RR**, Gross N, Godoy O. How does the interaction network determine the herbivory effects on plant coexistence? 1st SIBECOL Meeting. February 2019. Barcelona (Spain)
10. *Poster presentation.* **Granjel RR**, Arroyo J, Godoy O. How do biotic interactions and environmental conditions shape species coexistence? Ecology Across Borders 2017. December 2017. Ghent (Belgium)

C.3. Research projects

1. ChEMISt – Chemical Ecology, Multitrophic Interactions, and Stability. Unveiling the factors shaping agroecosystem stability under global change: phytochemistry, functional traits, and multitrophic interactions. Ref. 24-C1-Agro-TNA-032. Horizon Europe. AgroServ Transnational Access. Co-PIs: Lucille T. S. Chrétien and Daniel Montoya (Basque Centre for Climate Change (BC3)). 2024 – 2026. Estimated value of awarded access and analytical services: €85,000. My role: Beneficiary and postdoctoral researcher. Awarded
2. RECODYN – Ecosystem recovery dynamics and their response to climate change and habitat fragmentation. Ref. 101043548. European Research Council. ERC Consolidator Grant. PI: Daniel Montoya (Basque Centre for Climate Change (BC3)). 2023 – 2027. Total funding: €1,999,315. My role: Postdoctoral researcher in the project. Ongoing. I contribute fieldwork and Bayesian modelling of plant interactions and recovery under warming.
3. Fulbright Predoctoral Research Fellowship. The role of simple interactions in the stability and function of microbial communities. Fulbright Spain and Regional Government of Andalusia. Project lead: Rodrigo R. Granjel. Host: North Carolina State University. 2022 – 2023. Total funding: US$23,660. My role: Fellowship awardee and project lead. Completed. I studied microbial interactions, stability and functioning through experiments and modelling, hosted by William K. Petry.
4. CoVOCom – Coexistence and chemical communication between plants in response to insect herbivory. Spanish Association of Terrestrial Ecology (AEET). Tomando la Iniciativa. PI: Rodrigo R. Granjel. 2021. Total funding: €2,000. My role: Principal Investigator. Completed. I conceived and managed the project and secured its funding.
5. Mecanismos de mantenimiento de biodiversidad en ambientes variables. Ref. RTI2018-098888-A-I00. Spanish Ministry of Science, Innovation and Universities. Plan Nacional de I+D+i – Retos Investigación. PI: Oscar Godoy (Universidad de Cádiz). 2019 – 2021. Total funding: €105,270. My role: Work-team member and predoctoral researcher. My participation: 28 months. Completed

C.4. Knowledge and technology transfer

Contributions to be completed and selected.
